EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Arthur Steiner (Reg. No. 26,106) on 11/15/2004.

The application has been amended as follows:

IN THE CLAIMS

In claim 1, line 10, the phrase "said optical fiber transmission line" is deleted.

In claim 11, line 10, the phrase "said optical fiber transmission line" is deleted.

The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowable over the prior art of record for at least the reason that even though the prior art discloses optical fiber transmission systems wherein chromatic dispersion compensators are used to correct for chromatic dispersion of individual channels, the prior art fails to teach or reasonably suggest, regarding claims 1-10, an optical transmission system wherein when a bit rate is B at a specific wavelength in the second wavelength band, a chromatic dispersion value at the specific wavelength is between 0 and 7,500/B² ps/nm, and wherein, in the entire optical transmission system, loss in each signal channel is in the second wavelength band is smaller than the highest loss among losses in the signal channels in the first wavelength band,

Application/Control Number: 10/647,341

Art Unit: 2872

and regarding claims 11-20, an optical transmission system wherein when a bit rate is B at a

specific wavelength in the second wavelength band, a chromatic dispersion value at the specific

wavelength is between 0 and 7,500/B² ps/nm, and wherein, the lowest received power among the

received powers for the signal channels in the second wavelength band is higher than the lowest

optical power among the optical powers in the optical fiber transmission line on the signal

channels in the first wavelength band, as set forth by the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
